Bert-Wolfgang Schulze (Universität Potsdam, Germany)

Johannes Sjöstrand (Université de Bourgogne, Dijon, France)

Sundaram Thangavelu (Indian Institute of Science at Bangalore, India)

Maciej Zworski (University of California at Berkeley, USA)

Pseudo-Differential Operators: Theory and Applications is a series of moderately priced graduate-level textbooks and monographs appealing to students and experts alike. Pseudo-differential operators are understood in a very broad sense and include such topics as harmonic analysis, PDE, geometry, mathematical physics, microlocal analysis, time-frequency analysis, imaging and computations. Modern trends and novel applications in mathematics, natural sciences, medicine, scientific computing, and engineering are highlighted.

Recently published:

J. Sjöstrand

Non-Self-Adjoint Differential Operators, Spectral Asymptotics and Random Perturbations

Vol. 14

A. Unterberger

Pseudodifferential Methods in Number Theory

Vol. 13
