## **Innovation, Technology, and Knowledge Management**

Series Ed.: E.G. Carayannis

This series highlights emerging research and practice at the dynamic intersection of innovation, technology, and knowledge management, where individuals, organizations, industries, regions, and nations are harnessing creativity and invention to achieve and sustain growth. Volumes in the series explore the impact of innovation at the "macro" (economies, markets), "meso" (industries, firms), and "micro" levels (teams, individuals), drawing from such related disciplines as finance, organizational psychology, R&D, science policy, information systems, and strategy, with the underlying theme that in order for innovation to be useful it must involve the sharing and application of knowledge.

### **Recently published:**
