Proceedings in Information and Communications Technology

Series Description

The series "Proceedings in Information and Communications Technology (PICT)" was initiated by Springer Japan to publish high-quality proceedings and post-proceedings of computer science conferences in a timely manner, at a high level, and in both printed and electronic form.

PICT is devoted to the publication of peer-reviewed full papers of original research, as well as reviewed short papers and abstracts on work in progress, in areas related to "Information and Communications Technology."

In addition to globally relevant meetings with internationally representative program committees guaranteeing a stringent paper selection process, conferences held by societies or of high regional or national relevance are also considered for publication.

Publication Process

The language of publication is exclusively English. Authors publishing in PICT have to sign the Springer copyright transfer form; however, they are free to use their material published in PICT for substantially changed, more elaborate subsequent publications elsewhere. For the preparation of the camera-ready papers/files, authors must strictly adhere to the Springer PICT Authors' Instructions and are strongly encouraged to use the PICT LaTeX style files or templates.

To submit a proposal or request further information, please contact: pict@springer.jp
