

International Handbooks of Quality-of-Life

Series Ed.: G. Tonon

The International Handbooks of Quality of Life Research offer extensive bibliographic resources. They present literature reviews of the many sub-disciplines and areas of study within the growing field of quality of life research. Handbooks in the series focus on capturing and reviewing the quality of life research literature in specific life domains, on specific populations, or in relation to specific disciplines or sectors of industry. In addition, the Handbooks cover measures of quality of life and well-being, providing annotated bibliographies of well-established measures, methods, and scales.
