Behavior Science Perspectives on Culture and Community

Series: Behavior Analysis: Theory, Research, and Practice

- Supports and equips both specialists who intend to do research or practice with community and cultural-level systems, while remaining accessible enough for graduate students
- Timely and unique in its presentation of culturo-behavior systems science and building of connections for how this emerging sub-discipline can be taught more widely in behavior analysis education programs
- Meets emerging curricular needs exceptionally well, as it will be relevant for Verified Course Sequences (VCSs) for behavior analysis VCSs and ABAI accredited graduate training degree programs
- Contributors include many of the major scholars and practitioners conducting research and/or practicing in communities and larger cultural systems

All science proceeds by progressively building on the work of others while remaining open to new discoveries and challenging existing conceptual frameworks. The same is true of culturo-behavior science. This textbook presents the scientifically rigorous work of the last several decades that has taken a behavior-analytic view of social and cultural processes, with an eye for contributions that address social and cultural issues. The chapters herein explore and elaborate on the history, theories, and methodologies of culturo-behavior science and those of its researchers and practitioners. Throughout this volume, the authors intentionally prompt students to both learn from and question the current theory and methods while shaping their own research and practice. This book presents multiple intersecting perspectives intended for graduate-level students of behavior analysis. Contributors to this volume include many of the major scholars and practitioners conducting research and/or practicing in communities and larger cultural systems.
