Betriebswirtschaftslehre : Entrepreneurship

Halberstadt, J., Marx Gómez, J., Greyling, J., Mufeti, T.K., Faasch, H. (Hrsg.)

Resilience, Entrepreneurship and ICT

Latest Research from Germany, South Africa, Mozambique and Namibia

- Demonstrates how entrepreneurship and ICT can be combined to develop sustainable solutions
- Includes insights on various collaborative research projects between Germany and Southern African countries
- Illustrates how entrepreneurial thinking and ICT-based solutions can play key parts in building resilient communities

This book is based on the work of the YEEES Research Centre, an international network of scientists from partner universities in Germany, Mozambique, Namibia and South Africa. It presents inter- and transdisciplinary research that explores different ways of understanding resilience, an essential characteristic for systems, organizations and people – providing them with strength in the face of attacks and challenges, and both enabling and fostering constant adaptation and improvement. Building resilience to face today's ever-changing societal and environmental realities requires unbiased research activities that transcend the borders of countries and academic disciplines alike. The research addressed in this book, thus, is multidisciplinary and includes contributions to areas such as sustainable agriculture, entrepreneurial ecosystems, and smart communities, as well as groundbreaking work on skills development and ICT education. Highlighting the variety of research activities and their outcomes, this book offers a valuable resource for researchers and practitioners in the fields of sustainable resilience development.
