Landscape Theories

A Brief Introduction

- **Theoretical Approaches to landscape**
- **Introduction to the current discussions**
- **With theoretical considerations and empirical findings**

In the past decades, the discussion about theoretical approaches to the topic of 'landscape' has increased. This book presents the currently discussed theoretical approaches to landscape and shows its potentials and limits. The theoretical approaches are discussed on the basis of current questions, such as socialisation and the hybridisation of landscape, and combined with empirical results. This is followed by a discussion of the landscape policy operationalisation of theoretical considerations and empirical findings.
