Validation and Verification of Automated Systems

Results of the ENABLE-S3 Project

- Discusses the emerging topic of testing automated systems from the viewpoint of academia and industry
- Summarizes the main results of the European research project ENABLE-S3, covering all relevant aspects of testing automated systems including testing methodologies as well as testing environments
- Complemented by articles from related international activities from the USA and Asia

The book summarizes the main results of the the project ENABLE-S3 covering the following aspects: validation and verification technology bricks (collection and selection of test scenarios, test executions environments incl. respective models, assessment of test results), evaluation of technology bricks in selected use cases and standardization and related initiatives. ENABLE-S3 is an industry-driven EU-project and aspires to substitute today's cost-intensive verification and validation efforts by more advanced and efficient methods. In addition, the book includes articles about complementary international activities in order to highlight the global importance of the topic and to cover the wide range of aspects that needs to be covered at a global scale.
