Roggema, Rob (Ed.)

TransFEWmation: Towards Design-led Food-Energy-Water Systems for Future Urbanization

- Provides a sustainable city design for the FEW-nexus
- Insights into the application of food-energy-water nexus in urban design
- In-depth case studies and practical examples from five cities in four continents
- Linking design, engagement and assessment of design for sustainable resources

This book discusses a spectrum of approaches to designing the food-energy-water nexus at different spatial-urban scales. The book offers a framework for working on the FEW-nexus in a design-led context and integrates the design of urban neighbourhoods and regions with methodologies how to simultaneously engaging residents and stakeholders and evaluating the propositions in a FEW-print, measuring the environmental impact of the different designs. The examples are derived from on the ground practices in Sydney, Tokyo, Detroit, Amsterdam and Belfast.
