Lyophilization of Pharmaceuticals and Biologicals

New Technologies and Approaches

Series: Methods in Pharmacology and Toxicology

- Includes cutting-edge techniques
- Provides step-by-step detail essential for reproducible results
- Contains key implementation advice from the experts

This detailed volume brings together leading practitioners in the freeze-drying community to address recent progress, not only in new analytical tools and applications of the data derived in cycle design but also in the manufacturing of lyophilized products in the healthcare sector – whether these be therapeutics, vaccines or diagnostic products – and indeed the equipment to deliver this scale of freeze-drying. Areas of focus include analytical and formulation issues, process monitoring and control, as well as post-lyophilization analysis. Written for the Methods in Pharmacology and Toxicology series, chapters include the type of expert advice that leads to superior results in the lab. Authoritative and practical, *Lyophilization of Pharmaceuticals and Biologicals: New Technologies and Approaches* serves as an ideal guide for researchers working in or just seeking an update on this rapidly changing field.
