# Explorations in Art and Technology

- Contains 16-page colour section
- A unique volume bringing together the expertise of people working at the boundaries of art and digital media
- Additional material and links are available on the Web

Explorations in Art and Technology is about the creative process in action through the eyes of practitioners and researchers. The book explores the fascinating relationship between artist and technologist through studies of innovative projects that push the boundaries of digital art. The research sheds new light on the nature of interaction between people and computers and provides insight into the characteristics of environments in which creativity can be enhanced. In doing so, it presents a case for organisations to develop strategies for offering environments in which collaborative, sustainable partnerships can thrive. What emerges is a compelling story of new visions and new forms in a field that is set to transform traditional norms in both art and technology as we move through the 21st Century. Additional information and links are available at: <http://www.creativityandcognition.com>
