# Information Systems Outsourcing

The Era of Digital Transformation

Series: Progress in IS

- Provides a collection of contemporary high-quality articles on information systems outsourcing
- Examines examples of successful outsourcing in organizations through empirical surveys and case studies
- Shares insights into hot topics, such as innovation management, data sourcing, cloud sourcing, micro-services and multi-vendor management, crowdsourcing, robotics and strategic outsourcing in the light of digital transformation

This book highlights research that contributes to a better understanding of emerging challenges in information systems (IS) outsourcing. Important topics covered include: how to digitally innovate through IS outsourcing; how to govern outsourced digitalization projects; how to cope with complex multi-vendor and micro-services arrangements; how to manage data sourcing and data partnerships, including issues of cybersecurity; and how to cope with the increasing demands of internationalization and new sourcing models, such as crowdsourcing, cloud sourcing and robotic process automation. These issues are approached from the client's perspective, vendor's perspective, or both. Given its scope, the book will be of interest to all researchers and students in the fields of Information Systems, Management, and Organization, as well as corporate executives and professionals seeking a more profound analysis of the underlying factors and mechanisms of outsourcing.
