Computer Science : User Interfaces and Human Computer Interaction

Fairclough, Stephen H., Gilleade, Kiel (Eds.), Liverpool John Moores University School of Natural Sciences & Psychology, Liverpool, UK

Advances in Physiological Computing

- Broad overview of an emerging research field offering a unique and multidisciplinary insight into the area
- Emphasises the common ground between a range of physiological computing applications
- Provides a unique perspective on how we may interact with technology in the future

This edited collection will provide an overview of the field of physiological computing, i.e. the use of physiological signals as input for computer control. It will cover a breadth of current research, from brain-computer interfaces to telemedicine.
