# Processes and Phenomena on the Boundary Between Biogenic and Abiogenic Nature

Series: Lecture Notes in Earth System Sciences

- Presents a wide range of problems connecting with interactions between biogenic and abiogenic components in lithosphere, biosphere and technosphere
- Offers new interesting data about biomineralization and nature-like materials and technologies
- Discusses questions of biodeterioration of natural and artificial materials

The book represents a collection of papers presented at VI International Symposium "Biogenic - abiogenic interactions in natural and anthropogenic systems" that was held on 24-27 September 2018 in Saint Petersburg (Russia). Papers in this book cover a wide range of topics connecting with interactions between biogenic and abiogenic components in lithosphere, biosphere and technosphere. The main regarding topics are following: methods for studying the interactions between biogenic and abiogenic components; geochemistry of biogenic-abiogenic systems; biomineralization and nature-like materials and technologies; medical geology; biomineralogy and organic mineralogy; biomineral interactions in soil; biodeterioration of natural and artificial materials; biomineral interactions in extreme environment.
