Mathematics : Global Analysis and Analysis on Manifolds

Kielanowski, P., Odziejewicz, A., Previato, E. (Eds.)

Geometric Methods in Physics XXXVII

Workshop and Summer School, Biaowieża, Poland, 2018

The book consists of articles based on the XXXVII Biaowieża Workshop on Geometric Methods in Physics, 2018. The series of Biaowieża workshops, attended by a community of experts at the crossroads of mathematics and physics, is a major annual event in the field. This edition of the workshop featured a special session dedicated to Professor Daniel Sternheimer on the occasion of his 80th birthday. The previously unpublished papers present cutting-edge current research, typically grounded in geometry and analysis, with applications to classical and quantum physics. For the past seven years, the Biaowieża Workshops have been complemented by a School on Geometry and Physics comprising a series of advanced lectures for graduate students and early-career researchers. The book also includes abstracts of the five lecture series that were given at the seventh school.
