Social Sciences : Migration

Echeverría, Gabriel

Towards a Systemic Theory of Irregular Migration

Explaining Ecuadorian Irregular Migration in Amsterdam and Madrid

- This open access book provides new comparative, empirical, qualitative material on irregular migration
- Nests the understanding of irregular migration within a more general sociological interpretation of contemporary society
- Gives an alternative theoretical framework and critical review of irregular migration

This open access book provides an alternative theoretical framework of irregular migration that allows to overcome many of the contradictions and theoretical impasses displayed by the majority of approaches in current literature. The analytical framework allows moving from an interpretation biased by methodological nationalism, to a more general systemic interpretation. It explains irregular migration as a structural phenomenon of contemporary society, and why state policies are greatly ineffective in their attempt to control irregular migration. It also explains irregular migration as a diversified phenomenon that relates to the social characteristics of the context, and why states accept irregular migrants. By providing new comparative, empirical, qualitative material which allows to start filling an evident gap in the current research on irregular migration, this book is of interest to graduate students, scholars and policy makers.
