New Trends in Computational Vision and Bio-inspired Computing

Selected works presented at the ICCVBIC 2018, Coimbatore, India

- Highlights recent developments in the fields of Computational Vision, Fuzzy, Image Processing and Bio-inspired Computing
- Presents innovative solutions to real-world problems in industry and society as a whole, with applications ranging from healthcare to robotics
- Paves the ways for further research in these fields

This volume gathers selected, peer-reviewed original contributions presented at the International Conference on Computational Vision and Bio-inspired Computing (ICCVBIC) conference which was held in Coimbatore, India, on November 29-30, 2018. The works included here offer a rich and diverse sampling of recent developments in the fields of Computational Vision, Fuzzy, Image Processing and Bio-inspired Computing. The topics covered include computer vision; cryptography and digital privacy; machine learning and artificial neural networks; genetic algorithms and computational intelligence; the Internet of Things; and biometric systems, to name but a few. The applications discussed range from security, healthcare and epidemic control to urban computing, agriculture and robotics. In this book, researchers, graduate students and professionals will find innovative solutions to real-world problems in industry and society as a whole, together with inspirations for further research.
