Economics : Natural Resource and Energy Economics

Eisenriegler, Sepp (Ed.)

The Circular Economy in the European Union

An Interim Review

- Provides in-depth information on the current transition from a linear to a circular economic model on EU-level
- Argues for a resource efficient, sustainable circular economic system
- Collects expert voices from EU administration and politics, NGOs, industry and academia

The implementation of the circular economy will entail a major transformation from a resource-destroying, linear economy to a circular one that operates within the planet's regenerative boundaries. This book presents an interim assessment of the implementation of a circular economy in the EU. It reveals what achievements have been made in various EU institutions, but which are scarcely perceived by the public; which basic scientific principles can be applied in this context; and what NGOs are demanding beyond this progress. It provides convincing arguments for abandoning the "hamster wheel" of material-based satisfaction of our needs, and shows that the primacy of the economy stands in the way of a good life for all. Given its focus, it will appeal to everyone interested in an ecologically sustainable economic system.
