Global, Regional and Local Perspectives on the Economies of Southeastern Europe

Proceedings of the 11th International Conference on the Economies of the Balkan and Eastern European Countries (EBEEC) in Bucharest, Romania, 2019

- Includes theoretical and empirical research on economic and business issues in Southeastern and Central European countries
- Presents new ideas on how to resolve economic problems in the region
- Examines the Balkan and Eastern European economies in a pan-European context

This book includes papers presented at the 11th International Conference "Economies of the Balkan and Eastern European Countries" (EBEEC), held in Bucharest, Romania, in May 2019. It sheds new light on the micro- and macroeconomic developments in the Eastern European and Balkan countries, while at the same time taking into account the broader regional and global factors influencing these developments. By examining how the decisions and the performance of economic, social and political actors in the region are intertwined with wider regional and global events, the contributions highlight the dynamic development in Eastern Europe and the Balkans region. Further, the book demonstrates how the region has overcome numerous challenges in the past and is evolving within the framework of European economic integration and the global effervescent economy.
