Economics : Economic History

Gimatzidis, Stefanos, Jung, Reinhard (Eds.)

The Critique of Archaeological Economy

- Studies ancient economics from an interdisciplinary perspective
- Discusses critically dominant economic models for the study of ancient economies
- Covers a range of topics, such as trade in the classical Greek world, concepts of commodity and value, and management of economic affluence

This book studies past economics from anthropological, archaeological, historical and sociological perspectives. By analyzing archeological and other evidence, it examines economic behavior and institutions in ancient societies. Adopting an interdisciplinary perspective, it critically discusses dominant economic models that have influenced the study of past economic relations in various disciplines, while at the same time highlighting alternative theoretical trajectories. In this regard, the book's goal is not only to test theoretical models under scrutiny, but also to present evidence against the rationalization of past economic behavior according to the rules of modern markets. The contributing authors cover various topics, such as trade in the classical Greek world, concepts of commodity and value, and management of economic affluence.
