

Guido Schwarzer, James R. Carpenter, Gerta Rücker

Meta-Analysis with R

Series: Use R!

- Includes step-by-step tutorials to help the reader to understand and apply meta-analytical methods
- Takes readers through all the steps involved in preparing graphical summaries of results, using flexible software written by the authors
- Features extensive examples that strike an excellent balance between the how-to of the R code, the statistical methods involved, and discussion of the data and interpretation of the results
- Includes chapters on the following advanced topics: publication bias and small study effects; missing data; multivariate meta-analysis, network meta-analysis and meta-analysis of diagnostic studies
- Is supported by a supplementary web-resource at [www:meta-analysis-with-r.org](http://www.meta-analysis-with-r.org)

1st ed. 2015, XII, 252 p. 58 illus., 4 illus. in color.

This book provides a comprehensive introduction to performing meta-analysis using the statistical software R. It is intended for quantitative researchers and students in the medical and social sciences who wish to learn how to perform meta-analysis with R. As such, the book introduces the key concepts and models used in meta-analysis. It also includes chapters on the following advanced topics: publication bias and small study effects; missing data; multivariate meta-analysis, network meta-analysis; and meta-analysis of diagnostic studies.
