Management of Cyber Physical Objects in the Future Internet of Things

Methods, Architectures and Applications

- Focuses on new methods, architectures, and applications for the management of cyber physical objects (CPOs)
- Offers novel and effective Internet of Things (IoT) management methods, protocols, architectures, and systems
- Includes not only smartphones, tablets, PCs, but also cars, door locks, toys, clothes, etc

This book focuses on new methods, architectures, and applications for the management of Cyber Physical Objects (CPOs) in the context of the Internet of Things (IoT). It covers a wide range of topics related to CPOs, such as resource management, hardware platforms, communication and control, and control and estimation over networks. It also discusses decentralized, distributed, and cooperative optimization as well as effective discovery, management, and querying of CPOs. Other chapters outline the applications of control, real-time aspects, and software for CPOs and introduce readers to agent-oriented CPOs, communication support for CPOs, real-world deployment of CPOs, and CPOs in Complex Systems. There is a focus on the importance of application of IoT technologies for Smart Cities.
