

Judit Somlai, Tibor Kovács (Eds.)

Neuro-Ophthalmology

- Provides guidance for everyday neuro-ophthalmology practice
- Discusses diagnosis, treatment and rehabilitation
- Lavishly illustrated throughout

This practical guide provides an algorithm for diagnosis and treatment, from 'having some problem with vision', via diagnosis of cause and background, to treatment and eventually to rehabilitation. Following on from introductory sections devoted to the role of neuro-ophthalmology, recent developments in the field, and an overview of neuro-ophthalmological examinations, there are sections devoted to the different parts of the visual system, and finally a section on rehabilitation. Neuro-ophthalmology is aimed at ophthalmologists, neurologists, neurosurgeons, traumatologists, neuroradiologists, experts in cardiology and stroke, and trainees in these areas. It will also be of interest to neuro-rehabilitation specialists, neuropsychologists, and those working in typhlopedagogy and health informatics.

1st ed. 2016, XXI, 728 p. 456 illus., 245 illus. in color.
