This book presents 9 theory-based and practice-oriented methods for assessing and stimulating a multi-voiced dialogical self in the context of groups, teams, cultures, and organizations. All of these methods are based on Dialogical Self Theory. The book deals with the practical implications of this theory as applied in the areas of coaching, training, and counselling. A number of chapters focus on the process of positioning and dialogue on the level of the self, while other chapters combine self-processes with group work, and still others find their applications in leadership development and team-work in organizations. For each of the nine methods, the chapters present theory, method, case-study and discussions and make clear what kind of problems can be tackled using the method discussed.
