AETA 2017 - Recent Advances in Electrical Engineering and Related Sciences: Theory and Application

Series: Lecture Notes in Electrical Engineering

- Presents a selection of state-of-the-art contributions from interlinked fields, e.g. electrical engineering, control engineering, power electronics and distribution, telecommunication devices etc
- Includes the Proceedings of the 4th International Conference on Advanced Engineering – Theory and Applications 2017, held on December 07–09, 2017 at Ton Duc Thang University, Ho Chi Minh, Vietnam
- Written by prominent experts in the field

This proceedings book gathers papers presented at the 4th International Conference on Advanced Engineering Theory and Applications 2017 (AETA 2017), held on 7–9 December 2017 at Ton Duc Thang University, Ho Chi Minh City, Vietnam. It presents selected papers on 13 topical areas, including robotics, control systems, telecommunications, computer science and more. All selected papers represent interesting ideas and collectively provide a state-of-the-art overview. Readers will find intriguing papers on the design and implementation of control algorithms for aerial and underwater robots, for mechanical systems, efficient protocols for vehicular ad hoc networks, motor control, image and signal processing, energy saving, optimization methods in various fields of electrical engineering, and others.
