Advances in Information Systems Development

Methods, Tools and Management

Series: Lecture Notes in Information Systems and Organisation

- Presents new thinking on theoretical and practical concepts affecting the development and management of information systems
- Features current research on methodologies, modeling and management of information systems in areas such as HCI, education and cognitive science
- Highlights complexity in information systems in general, as well as their methods, tools and management

This volume features a collection of papers on emerging concepts, significant insights, novel approaches and ideas in information systems development. It examines advances in information systems development in general, and their impact on the development of new methods, tools and management. The book draws on selected invited papers from the 26th International Conference on Information Systems Development (ISD) held in Larnaca, Cyprus, September 6 - 8, 2017. The revised and expanded papers present research that focuses on methods, tools and management in information systems development. These issues are significant as they provide the basis for organizations to identify new markets, support innovative technology deployment, and enable mobile applications to detect, sense, interpret and respond to the environment.
