Popular Science : Popular Science in Political Science and International Relations

Rose, Richard, Peiffer, Caryn

Bad Governance and Corruption

- Looks at functional and dysfunctional aspects of corruption and asks how corruption differs across services
- Focuses on the experience that ordinary people have when dealing with officials who deliver public services
- Analyzes sample surveys from citizens that interact with public officials from more than 100 countries

This book explains why the role of corruption varies greatly between public services, between people, between national systems of governance, and between measures of corruption. More than 1.8 billion people pay the price of bad government each year, by sending a bribe to a public official. In developing countries, corruption affects social services, such as health care and education, and law enforcement institutions, such as the police. When public officials do not act as bureaucrats delivering services by the book, people can try to get them by hook or by crook. The book's analysis draws on unique evidence: a data base of sample surveys of 175,000 people in 125 countries in Africa, Asia, the Middle East, Europe, and North and South America. The authors avoid one-size-fits-all proposals for reform and instead provide measures that can be applied to particular public services to reduce or eliminate opportunities for corruption.
