Sven Ove Hansson (Ed.)

Technology and Mathematics

Philosophical and Historical Investigations

Series: Philosophy of Engineering and Technology

- Examines the interrelations between technology and mathematics
- Combines philosophical and historical approaches to the technology–mathematics relationship
- The contributors include leading experts in the philosophy and history of both technology and mathematics

This volume is the first extensive study of the historical and philosophical connections between technology and mathematics. Coverage includes the use of mathematics in ancient as well as modern technology, devices and machines for computation, cryptology, mathematics in technological education, the epistemology of computer-mediated proofs, and the relationship between technological and mathematical computability. The book also examines the work of such historical figures as Gottfried Wilhelm Leibniz, Charles Babbage, Ada Lovelace, and Alan Turing.
