Progress in Industrial Mathematics at ECMI 2010

Series: The European Consortium for Mathematics in Industry

- Accessible presentation of real-world problems in industry and finance
- Provides insight and tools for engineers and scientists which help to solve similar problems
- Modeling and simulation techniques provide a source of fresh ideas and inspiration for mathematicians

ECMI, the European Consortium for Mathematics in Industry, is the European brand associated with applied mathematics for industry and organizes highly successful biannual conferences. In this series, the ECMI 2010, the 16th European Conference on Mathematics for Industry, was held in the historic city hall of Wuppertal in Germany. It covered the mathematics of a wide range of applications and methods, from circuit and electromagnetic device simulation to model order reduction for chip design, uncertainties and stochastics, production, fluids, life and environmental sciences, and dedicated and versatile methods. These proceedings of ECMI 2010 emphasize mathematics as an innovation enabler for industry and business, and as an absolutely essential pre-requisite for Europe on its way to becoming the leading knowledge-based economy in the world.
