Robbins, Clarence R., Clermont, FL, USA

# Chemical and Physical Behavior of Human Hair

- “Bible of hair science”
- Most thoroughly referenced hair book with more hair micrographs than any
- Only single author book thus more coherent with shared interconnections across subjects & chapters
- Larger data bases for hair properties
- Author has unique expertise in relationship of hair fiber properties to assembly behavior, hair structure & reactions, > 40 years hair research, 72 publications & several awards

Human hair is the subject of a remarkably wide range of scientific investigations. Its chemical and physical properties are of importance to the cosmetics industry, forensic scientists and to biomedical researchers. The fifth edition of this book confirms its position as the definitive monograph on the subject. Previous editions were recognized as “concise and thorough” (Journal of the American Chemical Society), “an invaluable resource” (Canadian Forensic Science Society Journal), and “highly recommended” (Textile Research Journal). Chemical and Physical Behavior of Human Hair is a teaching guide and reference volume for cosmetic chemists and other scientists in the hair products industry, academic researchers studying hair and hair growth, textile scientists and forensic specialists. Features of the Fifth Edition: Recent advances in the classification and characterization of the different proteins and genes in IF and keratin associated proteins in human hair are described. The mechanism and incidence of hair growth and loss and hair density vs. age of males & females are described for Asians, Caucasians and Africans in different scalp regions. Details of hair surface lipids and cuticle membranes provide a better understanding of the surface and organization of the CMC and its involvement in stress strain is presented.
