

Alexander A. Kokhanovsky (Ed.)

Light Scattering Reviews 8

Radiative transfer and light scattering

Series: Environmental Sciences

- Up to date coverage of hot topics in light scattering and radiative transfer
- A perfect complement to the other books written by the author
- Provides new insights in recent advances in this field

Light scattering review (vol 8) is aimed at the presentation of recent advances in radiative transfer and light scattering optics. The topics to be covered include: scattering of light by irregularly shaped particles suspended in atmosphere (dust, ice crystals), light scattering by particles much larger as compared the wavelength of incident radiation, atmospheric radiative forcing, astrophysical radiative transfer, radiative transfer and optical imaging in biological media, radiative transfer of polarized light, numerical aspects of radiative transfer.

2013, XXVI, 634 p.
