Observation and Measurement of Ecohydrological Processes

- In depth summary bridging ecological systems and hydrological cycle
- Comprehensive description of various ecohydrological effects and water management process
- Contributors, both editors and authors, are the world class experts in their research areas with remarkable and prospective research activities

This volume will discuss the state of the art of different observation and measurement techniques useful for ecohydrological studies. The techniques cover the entire spectrum of the water-soil-plant-atmosphere continuum. And the other volumes are "Water and Ecosystems", "Water-Limited Environments" and "Integrated Ecohydrological Modeling" etc.
