Handbook of Vegetation Science

Life Sciences : Plant Sciences

White, J. (Ed.)

The Population Structure of Vegetation

The Handbook of Vegetation Science is growing. After the first volumes under my editorship have appeared the interest of the scientific community has been revived and many new volume editors have started their work. The present volume was jointly designed by Drs. J. White and W. Beetsink. Due to unforeseen developments Dr. White signs now as the sole editor. The development of this volume within the series had a special history as Dr. White points out in his preface. Adding to this I need only to state that I found it essential to include the topic of this volume into a Handbook of Vegetation Science. It was included therefore in my first revised list of topics to be included in the Handbook when I took over from Dr. Tüxen. It is a great pleasure for me to see this volume appear. Having read through the many contributions to this volume I can certainly congratulate Drs. White and Beetsink for their success in generating so much interest in this volume among their colleagues. The cooperation on this volume is the first sign that the new concept of the Handbook has been understood by the generation of scientists which I have to address. The influence this volume will have on the field of plant population studies only time can tell. It appears to me, however, that this volume will become a standard resource for some future. Dr. White asked me to have this volume dedicated to Dr. Rabotnov.
