Mathematics : Ordinary Differential Equations

Georgiev, Svetlin G.

Integral Equations on Time Scales

- **First book on time scale calculus**
- **Pedagogical organization helps the reader to learn quickly**
- **Analytical and numerical methods are covered**

This book offers the reader an overview of recent developments of integral equations on time scales. It also contains elegant analytical and numerical methods. This book is primarily intended for senior undergraduate students and beginning graduate students of engineering and science courses. The students in mathematical and physical sciences will find many sections of direct relevance. The book contains nine chapters and each chapter is pedagogically organized. This book is specially designed for those who wish to understand integral equations on time scales without having extensive mathematical background.
