Bioresources and Bioprocess in Biotechnology

Volume 2 : Exploring Potential Biomolecules

- **Comprehensively provides information on production of biologically active substances**
- **Includes chapters on bioprocess optimization including engineering aspects**
- **Provides in-depth information on sustainable utilization of bioresources**

This book is a compilation of detailed articles on various products and services that can be derived from bioresources through bioprocess. It offers in-depth discussions and case studies on commercially and therapeutically important enzymes, antimicrobials, anti-cancer molecules and anti-inflammatory substances. It also includes a separate section on emerging trends in bioactive substances research. This unique book is a valuable source of information for biotechnologists and bioprocess experts as well as academics and researchers who are actively involved in product and process development.
