Stephanie Leder

Transformative Pedagogic Practice

Education for Sustainable Development and Water Conflicts in Indian Geography Education

Series: Education for Sustainability

- Probes the gap between the transnational Education for Sustainable Development policy and pedagogic practice in India
- Develops principles and methods for Education for Sustainable Development grounded on critical pedagogy and the development of argumentation skills
- Offers original empirical analysis of curricula, syllabi, textbooks and teaching practices on the topic of water conflicts in Indian geography education
- Explores opportunities for innovation and paradigm change in classroom teaching and water education towards Education for Sustainable Development
- Contributes to the emerging body of qualitative educational geography research on sustainable development through an interdisciplinary synthesis between

This book explores how the transnational Education for Sustainable Development (ESD) policy is being translated into formal school education in India. Stephanie Leder investigates the ESD's transformative potential for pedagogic practice and builds a set of principles for how the global objectives of the ESD can be interpreted in diverse socio-cultural contexts. Her approach for transformative pedagogic practice emphasizes the promotion of a critical consciousness through argumentation skills. Using the case of water conflicts in geography education in India, the book reveals the contradictions between ESD objectives and curricula, syllabi, textbooks and classroom teaching at secondary schools in Pune, Maharashtra. Leder's approach demonstrates how principles of schooling can be altered towards learner-centered, problem-posing and network-thinking teaching approaches to empower students towards reflective decision-making on the sustainable use of natural resources.
