Energy : Fossil Fuels (incl. Carbon Capture)

Winter, F., Agarwal, R.A., Hrdlicka, J., Varjani, S. (Eds.)

CO₂ Separation, Purification and Conversion to Chemicals and Fuels

- Introduces the carbon economy and provides a complete overview of the process of carbon utilization
- Provides insights into the technical challenges of scaling up technologies
- Includes contributions from leading researchers in the field

This book presents the recent research on the separation, purification and downstream utilization of CO₂ and other flue gases. Chapters include a detailed discussion on the purification and further conversion of CO₂ to commodity chemicals and fuels. With contributions from renowned researchers in the field, the book focuses on the current challenges of catalytic high-pressure chemical conversion and biochemical conversion into high-value products. This book is of interest to researchers, professionals, and students working on carbon capture and sequestration, and is a valuable resource for policy makers and government agents working on guidelines and frameworks for carbon capture and reuse.
