Applications of Computing, Automation and Wireless Systems in Electrical Engineering

Proceedings of MARC 2018

• Highlights innovative research at the interface between computing, renewable energy, and network communications
• Presents state-of-the-art topics from an interdisciplinary perspective
• Includes contributions presented at MARC 2018

This book discusses key concepts, challenges and potential solutions in connection with established and emerging topics in advanced computing, renewable energy and network communications. Gathering edited papers presented at MARC 2018 on July 19, 2018, it will help researchers pursue and promote advanced research in the fields of electrical engineering, communication, computing and manufacturing.
