

Priti Joshi, Subir Shukla

Child Development and Education in the Twenty-First Century

- Presents innovative concepts in a lucid and engaging manner
- Addresses human development needs of children in the 21st century
- Provides practical suggestions to motivate children learn to read at home and school
- Deals with questions related to the impact of digital media on children at different ages

This book provides an in-depth understanding of how children's development at different stages of their lives interfaces with the kind of education and support they need at school and home. It examines closely how education, in turn, influences their development and prepares them for an uncertain future. The chapters focus on the rapid developments of the 21st century that are changing the nature of education, especially the shift needed to being able to sift through and meaningfully deal with overwhelming volumes of information now available. This book helps readers understand how children can benefit from the digital environment while avoiding its pitfalls. Keeping in mind that in today's world parents are getting to spend less time with their children, the authors provide research-backed ideas on how they can best enable children's development, including their thoughts, feelings and notions of self. Given the increasing disparities, there is a perceptive analysis of how education can build an awareness of equity in a context marked by diversity and disadvantage. This book addresses issues such as these in a reliable, scholarly yet accessible manner, for students, young researchers and lay readers. Consequently, it is a valuable source of fundamental insights and understanding for educators, policy-makers, educational administrators and students of human and child development, education, and teacher training courses.
