# Frontiers in Intelligent Computing: Theory and Applications

**Proceedings of the 7th International Conference on FICTA (2018),  
Volume 2**

- Presents recent research on intelligent engineering informatics
- Features original papers by prominent researchers, scientists, engineers and practitioners
- Includes theories, methodologies, new ideas, experiences, and applications in intelligent computing

This book presents the proceedings of the 7th International Conference on Frontiers of Intelligent Computing: Theory and Applications (FICTA 2018), held at Duy Tan University, Da Nang, Vietnam. The event brought together researchers, scientists, engineers, and practitioners to exchange ideas and experiences in the domain of intelligent computing theories with prospective applications in various engineering disciplines. These proceedings are divided into two volumes. Covering broad areas of intelligent engineering informatics, with papers exploring both the theoretical and practical aspects of various areas like ANN and genetic algorithms, human-computer interaction, intelligent control optimization, intelligent e-learning systems, machine learning, mobile computing, and multi-agent systems, this volume is a valuable resource for postgraduate students in various engineering disciplines.
