Sustainability and Environmental Decision Making

- Provides a unique reference for environmental policy matters
- Covers essential areas relevant to key environmental problems such as housing, transport, or energy-using durables
- Features concrete recommendations for decision-makers

The primary aim of this reference volume is to provide an accessible and comprehensive review of current methods used to address resource evaluation and environmental as well as climate issues, and in a manner easily understood by decision-makers and the non-economists interested in environmental policy matters. Theoretical insight and empirical observations from various countries will be presented and recommendations on sustainable environmental decision-making will be given. Natural resource managers, environmental and climate decision-makers, government policy makers, and economics scholars will all find this volume to be an essential reference.
