# Recent Trends in Thermal Engineering

Select Proceedings of ICAST 2020

Series: Lecture Notes in Mechanical Engineering

- Presents recent developments in the field of fluid dynamics and thermal engineering
- Covers topics such as HVAC systems, alternative fuels, renewable energy, nano fluids, industrial advancements in energy systems, energy storage, etc
- Presents select proceedings of ICAST 2020

This book presents the select proceedings of the International Conference on Advances in Sustainable Technologies (ICAST 2020), organized by Lovely Professional University, Punjab, India. It gives an overview of recent developments in the field of fluid dynamics and thermal engineering. Some of the topics covered in this book include HVAC systems, alternative fuels, renewable energy, nano fluids, industrial advancements in energy systems, energy storage, multiphase transport and phase change, conventional and non-conventional energy theoretical and experimental fluid dynamics, numerical methods in heat transfer and fluid mechanics, different modes of heat transfer, fluid machinery, turbo machinery, and fluid power. The book will be useful for researchers and professionals working in the field of fluid dynamics and thermal engineering.
