Games in Management Science

Essays in Honor of Georges Zaccour

Series: International Series in Operations Research & Management Science

- Highlights the latest treatment of emerging and revisited problems in management science that honors the scientific achievements of Professor Georges Zaccour
- Examines a wide variety of game theory applications
- Includes contributions from established experts in their respective fields

This book covers a large spectrum of cutting-edge game theory applications in management science in which Professor Georges Zaccour has made significant contributions. The book consists of 21 chapters and highlights the latest treatments of game theory in various areas, including marketing, supply chains, energy and environmental management, and cyber defense. With this book, former Ph.D. students and successful research collaborators of Professor Zaccour wish to honor his many scientific achievements.
