Mechanics of Materials – Formulas and Problems

Engineering Mechanics 2

- Accompanies the bestselling textbook series on Engineering Mechanics
- Offers numerous step-by-step solved mechanical problems to help the reader to consolidate their skills and learn quickly
- Provides a summary of important formulas with each chapter for efficient use

This book contains the most important formulas and more than 140 completely solved problems from Mechanics of Materials and Hydrostatics. It provides engineering students material to improve their skills and helps to gain experience in solving engineering problems. Particular emphasis is placed on finding the solution path and formulating the basic equations. Topics include: - Stress - Strain - Hooke's Law - Tension and Compression in Bars - Bending of Beams - Torsion - Energy Methods - Buckling of Bars - Hydrostatics
