

Gopinathan Anilkumar, Salim Saranya (Eds.)

# Green Organic Reactions

Series: Materials Horizons: From Nature to Nanomaterials

- Covers latest research and interdisciplinary applications of green chemistry
- Provides detailed discussions on the green aspects of several chemical reactions and processes
- Includes contributions from leading experts from academia and industry

This book presents important developments and applications of green chemistry, especially in the field of organic chemistry. The chapters give a brief account of green organic reactions in water, green organic reactions using microwave and in solvent-free conditions. In depth discussions on the green aspects of ionic liquids, flow reactions, and recoverable catalysts are provided in this book. An exclusive chapter devoted to green Lewis acid is also included. The potential of supercritical fluids as green solvents in various areas of organic reactions is explained as well. This book will be a valuable reference for beginners as well as advanced researchers interested in green organic chemistry.

1st ed. 2021, XX, 338 p. 348 illus., 108 illus. in color.
