Dynamic Perspectives on Creativity

New Directions for Theory, Research, and Practice in Education

- Brings together leading international experts whose work challenges current, static perspectives on creativity
- Provides fresh perspectives on how to conceptualize, study, and approach creativity in education as a dynamic phenomenon
- Introduces new approaches and methodologies for examining the dynamic nature of creativity in educational contexts

This edited volume provides a venue for scholars whose work challenges the typical, static conceptions, and methods of studying creativity. More specifically, the book will serve as an effort to introduce more dynamic definitions, conceptions, and approaches for studying creativity in the context of educational practice. By doing so, it feeds the strong contemporary need for more dynamic conceptions of creativity in educational settings. This is particularly important given the fast evolution of modern society and the widespread consensus that efforts to develop creative potential should be democratized -- extending well beyond the boundaries of the gifted subset and the walls of the classroom. This work recognizes that more dynamic perspectives on creativity are necessary for understanding its complexity, value, and meaning in educational contexts.
