Asia's Debt Capital Markets

Prospects and Strategies for Development

Series: The Milken Institute Series on Financial Innovation and Economic Growth

- Not only provides up-to-date data regarding the current condition of Asian bond markets, it provides an assessment of the outlook of bond markets in Asia, draws conclusions and provides a blueprint for development for policymakers and discusses emerging investment opportunities in the field
- Is unique in drawing upon the research, experience and perspectives of experts from the academic, legal, governmental and practical investment fields

The Development of Effective Securities Markets Gary Schinasi International Monetary Fund

One of the more important lessons of the crisis of the 1990s—^not just the Asian Crisis—is that the performance and structure of a country's financial system is an important fundamental factor for assessing that country's overall economic performance and prospects, and as a destination for investment and asset returns. Market participants that are presently managing international portfolios now understand this very well. And as we all know, many countries are making strong efforts to reform their financial infrastructures, and move their financial systems more in the direction of a market-intermediated financial system and away from an exclusively bank-intermediated system. These reform efforts are putting in place some of the important infrastructure elements that are necessary for developing effective securities markets. However, emphasis should be placed on the word necessary: as many of these measures, and all of them taken together, are only necessary and not sufficient for establishing effective security markets.
