

Khalid Saeed, Jerzy Pejas (Eds.)

Information Processing and Security Systems

- Presents state-of-the-art research in advanced computer systems and their applications within artificial intelligence, biometrics, information technology security, computational methods, algorithms and applications, computational science, education and industrial management applications

Information Processing and Security Systems is a collection of forty papers that were originally presented at an international multi-conference on Advanced Computer Systems (ACS) and Computer Information Systems and Industrial Management Applications (CISIM) held in Elk, Poland. This volume describes the latest developments in advanced computer systems and their applications within artificial intelligence, biometrics and information technology security. The volume also includes contributions on computational methods, algorithms and applications, computational science, education and industrial management applications.
