Business and Management : Operations Management

Geunes, Joseph, Pardalos, Panos M. (Eds.), University of Florida Dept. Industrial & Systems, Gainesville, FL, USA

Supply Chain Optimization

- Supply chain operations, planning, and design problems provide rich contexts for applied optimization
- Captures the ways in which leading researchers model and solve these difficult problems using advanced optimization techniques

Supply Chain Optimization captures the latest results in a segment of current research activity in supply chain management. This research area focuses on applying optimization techniques to supply chain management problems. The research papers that make up the volume provide a snapshot of state-of-the-art optimization methods within the field. This book presents rigorous modelling approaches for supply chain operations problems with a goal of improving supply chain performance (or the performance of some segment thereof). It contains high-quality works from leading researchers in the field whose expertise fits within this scope. The book provides a diverse blend of research topics and novel modelling and solution approaches for difficult classes of supply chain operations, planning, and design problems.
