Advances in Digital Forensics

**IFIP International Conference on Digital Forensics, National Center for
Forensic Science, Orlando, Florida, February 13-16, 2005**

- **Presents the most current research on digital forensics and its applications in
  security, digital evidence, and electronic crime investigations**
- **First volume of a new series produced by the IFIP Working Group 11.9 on
  Digital Forensics - an international community of scientists, engineers and
  practitioners dedicated to advancing the state of the art of research and
  practice in digital forensics**

Digital forensics deals with the acquisition, preservation, examination, analysis and presentation
of electronic evidence. Networked computing, wireless communications and portable electronic
devices have expanded the role of digital forensics beyond traditional computer crime
investigations. Practically every crime now involves some aspect of digital evidence; digital
forensics provides the techniques and tools to articulate this evidence. Digital forensics also
has myriad intelligence applications. Furthermore, it has a vital role in information assurance –
investigations of security breaches yield valuable information that can be used to design more
secure systems. Advances in Digital Forensics describes original research results and innovative
applications in the emerging discipline of digital forensics. In addition, it highlights some of the
major technical and legal issues related to digital evidence and electronic crime investigations.
The areas of coverage include: Themes and Issues in Digital Forensics Investigative Techniques
Network Forensics Portable Electronic Device Forensics Linux and File System Forensics
Applications and Techniques This book is the first volume of a new series produced by the
International Federation for Information Processing (IFIP) Working Group 11.9 on Digital
Forensics, an international community of scientists, engineers and practitioners dedicated to
advancing the state of the art of research and practice in digital forensics. The book contains a
selection of twenty-five edited papers from the First Annual IFIP WG 11.9 Conference on
Digital Forensics, held at the National Center for Forensic Science, Orlando, Florida, USA in
February 2005.
